WCA8 | 2017

It's an International Congress about plants-plants and plants-organisms chemical interactions that influence the plant development (growth, gas exchanges) and organisms reproduction.

WCA8 has been sponsored by the International Allelopathy Society¹ (IAS). It was founded in 1990 and it gathers a successful international membership panel (around 1000 members from more than 50 countries worldwide). This is the result of the exponential increase of the scientific publications in the allelopathy domain (from 50 to more than 1200 publications per year).

IAS has its origins from an International Congress organized every 3 years in different countries (Spain, Australia, USA, China, etc).

These multidisciplinary meetings bring together more than 200 scientists in several chemical ecology domains: ecology, agroecology, ecophysiology, chemistry, microbiology, entomology, horticulture and agronomy.

SCIENTIFIC OBJECTIVES

WCA will focus on the research developed in allelopathy field particularly in the Mediterranean ecosystems but also in the research done in other countries.

The Mediterranean Region is considered to be a good environmental model for studying the dynamics of ecosystems subject to global change.

WCA8 IN SHORT

200 participants

expected from :

France

Europe

Asia

North America

Researcher, students, experts and academic staff all gathered in order to talk, discuss and share the latest advances done in basic and applied research in allelopathy.

It is a world congress launched every 3 years. In 2017, it will take place the 8th WCA, 21 years after the 1st WCA in 1996 in Cadiz (Spain).

It's a 4 days congress that includes oral communications in different research subjects:

- Mediterranean ecosystems
- Forest ecosystems
- Insect plant interactions
- Soil microbial plant/rhizosphere interactions
- Impact of global changes on allelopathy
- Marine and freshwater interactions
- Terrestrial invasion
- Allelopathy in crops
- New chemistry, biosynthetic pathways and modes of action
- Metabolomics
- Challenges in ecosystems functioning

International experts are invited to present their work in oral and posters sessions in the prestigious city of Marseille Provence Metropole

There will be organized guided visits to the historical heritages of Marseille.

1 Site, Villa Méditerranée at Marseille (France)

SPONSORSHIP OPPORTUNITIES

WCA8 | 2017

SPONSORSHIP PACKAGES

By becoming a partner of WCA8, you participate in the dissemination and sharing of scientific knowledge while increasing the exposure of your company or institution.

The international audience of the congress and the quality of the participants will ensure a great visibility of our sponsors.

We offer you a series of sponsorship and exhibition options that will give you an exceptional opportunity to reach our audience and promote your image during the congress.

Platinum Sponsor pack [3500 €]

Before the congress

- Logo in the frontpage website
- Logo, page and link of the Platinum sponsor in the website

During the conference

- 1 furnished exhibition space for your company in the poster room
- A4 full colored adverts in the Conference guidebook
- Logo in plenary room and on the conf. guidebook
- Opportunity to distribute documentation in the welcome pack
- Logo in printed matters and conference signage

Invitation

- 1 Full pass including meals and Gala Dinner

Gold Sponsor pack [2500 €]

Before the congress

- Logo in the frontpage website
- Logo, page and link of the Gold sponsor in the website

During the conference

- A5 full colored adverts in the Conference guidebook
